

B & T AIR USW G17 Kit to G18 Modification

1. Download this template as PDF file, and print on A4 sized paper. Make sure your printer output is set to A4, and DO NOT SCALE the printout. Once you print out the template make sure the cut out size is 125mm wide x 29mm high
2. Cut out shape along the blue outside lines
3. Stick template onto the USW chassis by using double sided tape or a glue stick, make sure to line up the edges and the hole properly
4. Using a rotary cutting tool (Dremel Tool), cut along the dotted line to remove the shaded area. File or sand down edges if necessary
5. Remove template and any leftover glue residue
6. Your USW kit is now ready to accept a G18C pistol
